READING TABLES

Two new chromium reading tables

six dark leather and six yellow chromium chairs have been purchased and installed in the Camp Reading Room. This furniture was obtained with Company Fund and is very appropriate and adds greatly to the appearance of the room.

CAMP AREA

The entire camp area has been planted with grass and a variety of flowers. Although there is some shortage of water they seem to be thriving and growing each day. Take a pride in the appearance of your camp and do all you can to keep it up rather than be forced to do so.

CAMP BARBER SHOP

The camp Barber Shop is undergoing a complete remodeling. Another five foot extension is being put on so that there will be enough available space to install another chair. The building will be sealed in and the lighting more than adequate. It is tentatively planned at this time to make some arrangements so that lessons in barbering can be given to members of the company desiring such. This will provide an opportunity for members to learn a good trade.

EDUCATION

EDUCATION BUILDING

Now that we have our education building remodeled and up to a rating of second best in the district, it is up to us to keep it on top. The following rules must be observed at all times:

- 1: No one allowed in the Camp Reading Room without an O.D. Uniform or clean civilian clothes.
- 2: Absolutely no smoking in entire education building.
- 3: No hats can be worn in the entire building.
- 4: No "rough-housing" or unnecessary abuse to the furniture or fixtures.
- 5: Newspapers are not to be taken out of the holders.
- 6: Magazines must not be folded up or torn - cannot be taken from the Reading Room - must be replaced back in the rack.
- 7: Chairs must be kept away from the walls at all times.
- 8: Writing desks are to be used only for writing - not as reading tables.

VOCATIONAL CLASSES

The vocational classes in Auto Mechanics, Diesel and Welding have constructed some very useful display boards for visual educational purposes. It would be of interest for every member of the company to examine these boards. The Auto Mechanics Class have an Automotive Parts and an Electric Wiring System boards and a complete Stock Car motor and transmission and a Truck Transmission mounted and cut open for motion study. The Diesel Class have five boards and the Welding Class have a board of Welding Rods.

A power driven $\frac{1}{2}$ inch Band Saw has also been constructed by the Welding Class. They are now planning on making a power driven Planner.
